

Paediatric Trainees Return to Training

Neonatal Simulation

New ways of working during Covid-19

Monday November 16th 2020

9.30am - 1.30pm

All online/virtual via MS Teams

This virtual training package, aimed at all paediatric trainees returning to work. It is focussed around building confidence when returning to neonatal work, exploring the challenges around Covid-19, as well as covering neonatal resuscitation and multidisciplinary working. We have developed a novel stop-start technique of simulation where viewers influence the outcome of Covid related scenarios including a neonate born to a Covid + mother, a post natal collapse, donning and doffing PPE and real time transfer to Embrace, with opportunities for SLEs. Updates on guidelines and confidence building sessions and signposting to further learning will be available.
