Foundation Training Job Description

Grade	F1
Placement	General Internal Medicine
Department	Acute Internal Medicine
The type of work to expect and learning opportunities	Working on the medical speciality short stay ward. 18 Bedded ward which receives unselected medical patients from the acute medical unit who are expected to have a short length of stay. There will be an opportunity to see a wide range of medical patients across all specialities, as well as to work with consultants from a variety of specialities. The ward doctor will be expected to join the educational consultant led ward round, work on the tasks assigned during the ward round, look after the medical patients on the ward and review and escalate any clinical deterioration. They will be expected to work as part of a multidisciplinary team including staff nurses, pharmacists, other doctors, therapists and other healthcare professionals. Ward 36 is expected to be a high turn over ward, so, it is a great opportunity to observe

	clinical improvement after medical intervention. There may also be opportunity to spend time working on the Same Day Care Unit as well as the Acute Medical Admissions unit where the FY1s will assess acute admissions and then present to the medical consultants.
Where the placement is based	HRI
Educational and Clinical Supervisor(s) for the placement	Dr Edward Middleton
Main duties of the placement	To attend the ward round with the medical consultants and then carry out any required jobs. To follow up on investigations and then to act on results or inform senior. To assess any patient on the ward who require a medical assessment. To liaise with different specialties if required. To clerk patients during the AMU on call block.
Typical working pattern in this placement	There will be a block of oncall shifts on the AMU and the remaining time will be 9-5 on the medical short stay ward.
Employer	Hull University Teaching Hospital NHS Trust

It is important to note that this description is a typical example of your placement and may be subject to change.
