

TEES, ESK & WEAR VALLEYS NHS FOUNDATION TRUST

JOB DESCRIPTION

POST TITLE: Foundation Programme Year 1 in Psychiatry

DURATION: 4 months

LOCATION: York Teaching Hospital

SPECIALTY: Mental Health Services for Older People (MHSOP)

CLINICAL SUPERVISOR: Dr Dichelle Wong

Brief description of the clinical service

The post of Foundation Year 1 Doctor will be based with the Mental Health Assessment and Liaison Team (MHALT) for Older People.

Drs Dichelle Wong, Jeffrey Clarke and David Braun (Consultant Psychiatrists for Older People) and MHALT nurses assess and review patients (usually over 65 years old) who require mental health input on wards within York District Hospital. You will see patients with physical illness presenting with a variety of mental health conditions, for example, dementia, delirium, depression, Schizophrenia, Bipolar Affective Disorder and anxiety.

Key professional relationships

The post holder will:

- Be accountable to the Consultant Psychiatrist for Older People in locality
- Work with members of the multidisciplinary team including nursing staff, occupational therapists, physiotherapists and pharmacists
- Be involved in the assessment/management of patients with mental health related presentations in the in-patient setting
- Be involved in the assessment/management of patients who present with physical health conditions and mental health conditions whilst in the in-patient setting
- Gain community experience (for example out-patient clinics and experience with a community mental health team)

Induction

At the beginning of your placement you will take part in an induction programme including e- learning mandatory and statutory training. The induction will introduce you to the Trust if you have not previously worked with us before. As part of the induction you will be introduced to the workplace and informed of the requirements of the post.

Main duties of the post holder – professional, clinical, administrative

Clinical supervision will take place weekly for one hour with your Clinical Supervisor Dr Wong. Allocated time will be given for work based assessments. Clinical supervision will be available

throughout the week from Dr Wong or covering consultant(s) if Dr Wong is off or not on site. In the absence of Dr Wong, Dr David Braun and/or Dr Jeffrey Clarke are the covering consultants. They can be reached on their mobile phones via the Huntington House switchboard (01904-556700). Dr Wong will send out cover arrangements by e-mail before she goes on leave. The Liaison Mental Health Team (LMHT) based at York Hospital Emergency Department provides cover for MHALT out of hours and during public holidays. Their contact number is 07852 527593.

Duties of the Post

1. Clinical:

- To participate in the mental health assessments of in-patients in York Hospital including the completion of full psychiatric histories, review of previous notes, and mental state examinations. With experience you will contribute to risk assessments

The post holder will also have the experience of:

- Gaining experience in managing both common and complex psychiatric presentations
- The use of the Mental Health Act and Mental Capacity Act

2. Teaching Medical students and Allied Staff

- To participate in opportunistic teaching of team members and medical students

3. Administration:

- To maintain accurate and clear records using the York Hospital System
- To communicate with staff, patients and their carers in a timely and effective manner
- To liaise with other professional staff and agencies

4. Education and Training:

- Clinical supervision is provided as required throughout the week by the Consultant or covering consultant
- There will be a supervision session for one hour per week
- Educational supervision will be provided by your Educational Supervisor
- To attend the weekly postgraduate teaching programme
- To become involved in medical student teaching

5. Research and Audit:

- To develop audit skills – this may involve participation in the audit programme and completion of an audit project during the post
- Explore opportunities to become involved in research activities as appropriate

Settings of where the work will be carried out:

- Various wards in York District Hospital
- Out-patient clinics and community mental health teams in TEWV out with York Hospital

Educational opportunities and objectives:

There will be an expectation that you attend local postgraduate teaching programmes, as well as specific programmes that Foundation Year 1 Programme facilitates.

Foundation Year 1 Doctor timetable – Protected time to complete ePortfolio to be agreed with clinical supervisor at the start of the placement

	Morning	Afternoon
Monday	9-1 Patient reviews with Dr Wong 9:30 MHALT meeting	1:15-1:45 MHALT meeting 1:45-5 reviews with Dr Braun
Tuesday	9 -11 Reviews with Dr Ogba, e-learning or reading 9:30 MHALT meeting 11-12 supervision (Dr Wong's office on ward 24)	1:15-1:45 MHALT meeting 1:45-5 reviews with Dr Ogba/ Dr Braun
Wednesday	9-11 psychiatry teaching, then admin/psychiatry reading time & lunch	12:30-2 FY teaching 2-5 reviews with Dr Clarke
Thursday	9 -1 community experience (e.g. clinic, CMHT, CHADT)* <i>or if community experience takes place on a different day: 9-9:30 reading/ reviews 9:30 MHALT meeting, then reviews with Dr Wong till 1 pm</i>	1:15-1:45 MHALT meeting 1:45-5 reviews with Dr Wong
Friday	9-9:30 reading/reviews 9:30 MHALT meeting, then reviews with Dr Ogba till 1 pm	1:15-1:45 MHALT meeting 1:45-5 reviews with Dr Ogba/ Dr Braun

Clinical supervisor timetable (Dr Dichelle Wong)

	Morning	Afternoon
Monday	MHALT Clinical Work 9:30 MHALT meeting	Meadowfields: Report out 13.15 Patient reviews/meetings/tribunals
Tuesday	MHALT / SPA non-clinical time 9:30 MHALT meeting 10.00 – 11.00 Supervision of Specialty Dr (alternate weeks) 11.00 -12.00 Supervision of F1 Dr	Meadowfields: Report out 13.15 Patient reviews/meetings/tribunals

Wednesday	SPA non-clinical time	Meadowfields: Report out 13.15 Patient reviews/meetings/tribunals
Thursday	MHALT Clinical Work 9:30 MHALT meeting	MHALT 1:15-1:45 MHALT meeting Clinical Work
Friday	SPA non-clinical time	Meadowfields: Report out 13.15 Patient reviews/meetings/tribunals

Curriculum outcomes expected to be achieved

Curriculum domain		Roles and responsibilities that will allow trainee to achieve this competency
Section 1: Professional behaviour and trust		
1. Acts professionally		
1.1	Professional behaviour	<ul style="list-style-type: none"> • Acts in accordance with General Medical Council (GMC) guidance in all interactions with patients, relatives/carers and colleagues • Acts as a role model for medical students, other doctors and healthcare workers • Acts as a responsible employee and complies with local and national requirements e.g. completing mandatory training • Ensuring immunization against communicable diseases • Engaging in appraisal and assessment • Taking responsibility for ensuring appropriate cover during leave • Adhering to local sickness and return to work policies
1.2	Personal organisation	<ul style="list-style-type: none"> • Attends on time for all duties, including handovers, clinical commitments and teaching sessions • Organises and prioritises workload as a matter of routine • Delegates or seeks assistance when required to ensure that all tasks are completed

1.3	Personal responsibility	<ul style="list-style-type: none"> • Attends on time for all duties, including handovers, clinical commitments and teaching sessions • Organises and prioritises workload as a matter of routine • Delegates or seeks assistance when required to ensure that all tasks are completed
-----	-------------------------	--

2. Delivers patient centred care and maintains trust		
---	--	--

2.1	Patient centred care	<ul style="list-style-type: none"> • Considers the patient as a whole e.g. respecting their personal circumstances, dignity, autonomy, individual healthcare decisions, and right to privacy
2.2	Trust	<ul style="list-style-type: none"> • Acts with empathy, honesty and sensitivity in a non-confrontational manner • Recognises that the decisions of an individual with capacity are paramount • Respects the known wishes of the patient and decisions taken in advance e.g. advance decision to refuse treatment (ADRT) and do not attempt cardiopulmonary resuscitation (DNACPR) and manages the patient accordingly
2.3	Consent	<ul style="list-style-type: none"> • Obtains and correctly documents consent for core procedures in accordance with GMC and local guidance • Assesses mental capacity to give consent

3. Behaves in accordance with ethical and legal requirements		
---	--	--

3.1	Ethical and legal requirements	<ul style="list-style-type: none"> • Practises in accordance with guidance from the GMC, relevant legislation and national and local guidelines • Demonstrates understanding of the risks of legal and disciplinary action if a doctor fails to achieve the necessary standards of practice and care
3.2	Confidentiality	<ul style="list-style-type: none"> • Describes and applies the principles of confidentiality in accordance with GMC guidance • Ensures the patient's rights of confidentiality when clinical details are discussed, recorded in notes or stored electronically • Complies with information governance standards regarding confidential personal information • Follows GMC guidance on the use of social media • Describes when confidential information may be shared with appropriate third parties e.g. police and DVLA

3.3	Statutory documentation	<ul style="list-style-type: none"> • Completes statutory documentation correctly e.g. death certificates • Statement for fitness to work • Cremation forms
3.4	Mental capacity	<ul style="list-style-type: none"> • Performs mental state examination and assessment of cognition and capacity • Uses and documents the 'best interests checklist' when an individual lacks capacity for a specific decision • Demonstrates awareness of the principles of capacity and incapacity as set out in the Mental Capacity Act 2005 (or Adults with Incapacity (Scotland) Act 2000) • Demonstrates understanding that there are situations when it is appropriate for others to make decisions on behalf of patients (e.g. lasting power of attorney, and guardianship) • Demonstrates understanding that treatment may be provided against a patient's expressed wishes in certain defined circumstances
3.5	Protection of vulnerable groups	<ul style="list-style-type: none"> • Recognises the potentially vulnerable patient
4. Keeps practice up to date through learning and teaching		
4.1	Self-directed learning	<ul style="list-style-type: none"> • Acts to keep abreast of educational / training requirements • Maintains a contemporaneous e-portfolio which meets training programme requirements • Demonstrates change and improvement in practice as a result of reflection on personal experience, multi-source feedback (MSF) and feedback from supervised learning events (SLEs). • Identifies and addresses personal learning needs
4.2	Teaching and assessment	<ul style="list-style-type: none"> • Delivers teaching sessions and presentations which support learning to medical students and other members of the multidisciplinary team • Describes the role and value of the 'developing the clinical teacher' supervised learning event
5. Demonstrates engagement in career planning		

5.1	Demonstrates engagement in career planning	<ul style="list-style-type: none"> • Discusses how to achieve career ambitions with educational supervisor • Maintains an e-portfolio record of evidence demonstrating realistic career goals based on career guidance, self-awareness, information gathering, selection processes and discussion with colleagues • Maintains an e-portfolio record of activities demonstrating exploration of possible specialty career options e.g. completion of taster period and reflection on the experience
-----	--	---

Section 2: Communication, team-working and leadership

6. Communicates clearly in a variety of settings

6.1	Communication with patients/relatives/carers	<ul style="list-style-type: none"> • Introduces themselves to patient/carer/relative stating name and role • Communicates clearly, politely, considerately, with understanding and empathy • Ensures sufficient time and appropriate environment for communication
6.2	Communication in challenging circumstances	<ul style="list-style-type: none"> • Uses appropriate styles of communication • Seeks/provides additional support in situations where patient's ability to communicate may be impaired • Breaks bad news compassionately and supportively
6.3	Complaints	<ul style="list-style-type: none"> • Acts in an open and transparent way and notifies all appropriate persons including the patient when safety has (or potentially has) been compromised • Apologises for errors and takes steps to minimise impact
6.4	Patient records	<ul style="list-style-type: none"> • Maintains accurate, legible and contemporaneous patient records and ensures that entries are signed and dated in compliance with "Standards for the structure and content of patient records Health and Social Care Information Centre / Academy of Medical Royal Colleges (AoMRC) 2013"
6.5	Interface with other healthcare professionals	<ul style="list-style-type: none"> • Describes the structure and importance of the wider healthcare team • Works effectively within the healthcare team for the benefit of patient care • Makes clear, concise and timely written and oral referrals to other healthcare professionals within the hospital • Produces a timely, legible discharge summary that

		identifies principle diagnoses, key treatments/interventions, discharge medication and follow-up arrangements
--	--	---

7. Works effectively as a team member		
--	--	--

7.1	Continuity of care	<ul style="list-style-type: none"> • Gives structured handover to ensure safe continuing care of patients • Makes adequate arrangements for cover e.g. handing over bleep during educational sessions
-----	--------------------	---

7.2	Interaction with colleagues	<ul style="list-style-type: none"> • Acts as a member of the multidisciplinary professional team by supporting, respecting and being receptive to the views of other healthcare professionals • Works effectively with others towards a common goal e.g. accepts instructions and allocation of tasks from seniors at handovers and multidisciplinary team meetings • Contributes to multidisciplinary team (MDT) meetings e.g. by case presentation, making records
-----	-----------------------------	---

8. Demonstrates leadership skills		
--	--	--

8.1	Leadership	<ul style="list-style-type: none"> • Leads within allocated roles e.g. when asked to organise medical students • Describes the organisational structures and chains of responsibility including principles of line management in medical and non-medical staff • Demonstrates leadership during routine tasks e.g. organising and performing core procedures
-----	------------	---

Section 3: Clinical Care		
---------------------------------	--	--

9. Recognises, assesses and initiates management of the acutely ill patient		
--	--	--

9.1	Recognition of acute illness	<ul style="list-style-type: none"> • Responds promptly to notification of deterioration or concern regarding a patient's condition e.g. change in National Early Warning Score (NEWS) • Prioritises tasks according to clinical urgency and reviews patients in a timely manner • Recognises, manages and reports transfusion reactions, according to local and national guidelines
-----	------------------------------	--

9.2	Assessment of the acutely unwell patient	<ul style="list-style-type: none"> • Recognises and promptly assesses the acutely ill, collapsed or unconscious patient using an Airway, Breathing, Circulation, Disability, Exposure (ABCDE) approach and:
-----	--	--

		<ul style="list-style-type: none"> ○ Correctly interprets clinical and non-invasive monitoring of vital signs* ○ Informs senior colleague and requests assistance / review e.g. NEWS \geq 5 * Utilises normal age-related reference ranges for vital signs in infants and children
9.3	Immediate management of the acutely unwell patient	<ul style="list-style-type: none"> • Initiates prompt appropriate management to stabilise/prevent further deterioration in patients with common acute presentations (including mental health) and seeks timely senior help with the further management • Delivers immediate therapy (e.g. oxygen, fluid challenge, antibiotics) to an acutely ill patient • Identifies electrolyte imbalance and, with senior advice, delivers a safe and effective method of correction • Records and acts on changes in physiological status, anticipating and planning appropriate action to prevent deterioration in vital signs • Communicates with the patient, relatives and carers and ensures they are supported
10. Recognises, assesses and manages patients with long term conditions		
10.1	Management of long term conditions in the acutely unwell patient	<ul style="list-style-type: none"> • Recognises acute manifestations/exacerbations/progression and new complications of long-term conditions and their causes • Recognises how acute illness or injury will interact with pre-existing chronic illness/disability
10.2	The frail patient	<ul style="list-style-type: none"> • Recognises frailty • Formulates individual patient management plan based on assessment of frailty as well as clinical need
10.3	Support for patients with long term conditions	<ul style="list-style-type: none"> • Evaluates patients' capacity to self-care, including mental health aspects • Organises physiotherapy and occupational therapy for inpatients with long-term mobility problems
10.4	Nutrition	<ul style="list-style-type: none"> • Describes the prevalence of nutritional disorders in patients with long-term conditions • Routinely assesses patients' basic nutritional requirements • Performs basic nutritional screen including assessing growth in children
11. Obtains history, performs clinical examination, formulates differential diagnosis and management plan		

11.1	History	<ul style="list-style-type: none"> Obtains and presents accurate patient history, utilising all relevant sources of information including carers/family, doing so in a timely manner
11.2	Physical and mental state examination	<ul style="list-style-type: none"> Performs competent physical and mental state examination in a timely manner Presents examination, including mental state, findings succinctly and accurately Uses a chaperone, where appropriate
11.3	Diagnosis	<ul style="list-style-type: none"> Formulates appropriate physical/mental health differential diagnoses, based on history, examination and immediate investigations Requests and interprets necessary investigations to confirm diagnosis Confirms initial diagnosis with more senior doctor Takes account of probabilities in ranking differential diagnoses
11.4	Clinical management	<ul style="list-style-type: none"> Formulates problem list and confirms management plan with more senior doctor and initiates management plan within limits of competence Performs an accurate cognitive assessment or screen for dementia and delirium
11.5	Clinical review	<ul style="list-style-type: none"> Undertakes regular reviews, amends differential diagnosis and expedites patient investigation and management in the light of developing symptoms and response to therapeutic interventions
11.6	Discharge planning	<ul style="list-style-type: none"> Anticipates and ensures patients are prepared for discharge taking medical and social factors into account Makes early referral within the multidisciplinary team and to community agencies Communicates with primary care and other agencies
11.7	Discharge summaries	<ul style="list-style-type: none"> Anticipates and ensures patients are prepared for discharge taking medical and social factors into account Makes early referral within the multidisciplinary team and to community agencies Communicates with primary care and other agencies
12. Requests relevant investigations and acts upon results		
12.1	Investigations	<ul style="list-style-type: none"> Requests/arranges investigations which are necessary to assist diagnosis and monitor treatment and are appropriate for patients' needs in

		<p>accordance with local and national guidance</p> <ul style="list-style-type: none"> • Ensures correct identification of patients when collecting and labelling samples • Ensures correct identification of patients when reviewing results and planning consequent management • Minimises risk of exposing a pregnant woman to radiation
12.2	Interpretation of investigations	<ul style="list-style-type: none"> • Seeks, interprets, records and relays/acts on results of ECG, laboratory tests, basic radiographs and other investigations and explains these effectively to patients
13. Prescribes safely		
13.1	Correct prescription	<ul style="list-style-type: none"> • Prescribes medicines, blood products and fluids correctly, accurately and unambiguously in accordance with GMC and other guidance using correct documentation to ensure that patients receive the correct drug via the correct route at the correct frequency and at the correct time • Demonstrates understanding of responsibilities and restrictions with regard to prescribing high risk medicines including anticoagulation, insulin, chemotherapy and immunotherapy • Performs dosage calculations accurately and verifies that the dose calculated is of the right order • Reviews previous prescriptions and transfers/transcribes accurately and appropriately • Describes the potential hazards related to different routes of drug administration (e.g. oral, intramuscular, intravenous, intrathecal) • Follows the guidance in Good Medical Practice in relation to self-prescribing and prescribing for friends and family • Within the hospital, prescribes controlled drugs using appropriate legal framework and describes the management and prescribing of controlled drugs in the community • Describes the importance of security issues in respect of prescriptions
13.2	Clinically effective prescription	<ul style="list-style-type: none"> • Prescribes and administers for common important indications including medicines required urgently in the management of medical emergencies e.g. sepsis, exacerbation of chronic obstructive pulmonary disease, pulmonary oedema, congestive cardiac failure, pain, thromboprophylaxis • Prescribes safely for different patient groups including frail elderly, children, women of child-

		<p>bearing potential, pregnant women and those with hepato-renal dysfunction</p> <ul style="list-style-type: none"> • Prescribes and administers oxygen, fluids and antimicrobials as appropriate e.g. in accordance with NICE guidance on antimicrobial and intravenous fluid therapy • Chooses appropriate intravenous fluids as vehicles for intravenous drugs and calculates the correct volume and flow rate • Assesses the need for fluid replacement therapy and chooses and prescribes appropriate intravenous fluids and calculates the correct volume and flow rates • Prescribes and administers blood products safely in accordance with guidelines/protocols on safe cross matching and the use of blood and blood products
13.3	Discussion of medication with patients	<ul style="list-style-type: none"> • Discusses drug treatment and administration with patients/carers, including duration of treatment, unwanted effects and interactions • Obtains an accurate drug history, including allergy, self-medication, use of complementary healthcare products and enquiry about allergic and other adverse reactions
13.4	Guidance on prescription	<ul style="list-style-type: none"> • Prescribes using all available support including local and national formularies, pharmacists and more experienced prescribers to ensure accurate, safe and effective error-free prescribing, whilst recognising that legal responsibility remains with the prescriber • Prescribes according to relevant national and local guidance on antimicrobial therapy, recognising the link between antimicrobial prescribing and the development of antimicrobial resistance
13.5	Review of prescriptions	<ul style="list-style-type: none"> • Reviews prescriptions regularly for effectiveness and safety taking account of patient response, adverse reactions and drug level monitoring • Recognises and initiates action for common adverse effects of drugs and communicates these to patients, including potential effects on work and driving
<p>14. Performs procedures safely</p> <p>(Core procedures are mandated by the General Medical Council (GMC) and trainees must be signed off a competent to perform them. Trainees may have the opportunity to perform many other procedures according to their clinical placements.</p>		

Trainees should only perform procedures independently or teach medical students core procedures when they have been sanctioned to do this by their supervisor.)

14.1	Core procedures	<ul style="list-style-type: none"> • Performs competently the core procedures either in the workplace or on simulated patients • For each procedure, the foundation doctor should know the indications and contraindications and be able to <ul style="list-style-type: none"> ○ Explain the procedure to patients, including possible complications, and gain valid informed consent ○ Prepare the required equipment, including a sterile field ○ Position the patient ○ Prescribe and/or administer appropriate analgesia in certain patients ○ Adequately prepare the skin using aseptic technique where relevant ○ Administer local anaesthetic correctly for the procedure ○ Recognise, record and be able to undertake emergency management of common complications ○ Safely dispose of equipment, including sharps ○ Document the procedure, including the labelling of samples and giving instructions for appropriate aftercare/monitoring
14.2	Other procedures	Performs under supervision procedures linked to a specialty placement
15. Is trained and manages cardiac and respiratory arrest		
15.1	Is trained and manages cardiac and respiratory arrest	<ul style="list-style-type: none"> • Initiates and responds to a crash call • Functions as a competent member of the team providing immediate life support • Is trained: <ul style="list-style-type: none"> ○ To initiate and perform immediate adult life support comprising cardiopulmonary resuscitation, simple airway management and safe defibrillation ○ To provide basic paediatric life support (for doctors working with infants and children) ○ To use a defibrillator ○ To adapt resuscitation in certain situations e.g. in pregnant patients

15.2	Do not attempt cardiopulmonary resuscitation orders	<ul style="list-style-type: none"> • Demonstrates understanding of and respect for do not attempt cardiopulmonary resuscitation (DNACPR) decisions
16. Demonstrates understanding of the principles of health promotion and illness prevention		
16.1	Demonstrates understanding of the principles of health promotion and illness prevention	<ul style="list-style-type: none"> • Explains to patients the possible effects of lifestyle, including the effects of diet, nutrition, inactivity, smoking, alcohol and substance abuse • Recognises the impact of wider determinants of health and advises on preventative measures with reference to local and national guidelines including: <ul style="list-style-type: none"> ○ Smoking cessation and supportive measures ○ Appropriate alcohol intake levels or drinking cessation ○ Illicit drug use and referral to support services ○ Biohazards ○ Risks of UV and ionising radiation especially the harmful effects of sunlight ○ Lack of exercise and physical/mental activity ○ Weight management ○ Employment ○ Vaccination programmes ○ Cancer screening e.g. breast, cervical, bowel • Recommends well man/women clinics
17. Manages palliative and end of life care *It is highly likely that this outcome will not be achievable within a Psychiatry placement*		
17.1	End of Life Care	<ul style="list-style-type: none"> • Contributes as a member of the multidisciplinary team to delivering high quality end of life care that is in line with the individuals' needs and preferences • Recognises that a patient is likely to die in the next few hours or days and: <ul style="list-style-type: none"> ○ Assesses whether this is reversible and, if so, whether this is in line with the patient's wishes ○ Ensures that this is communicated clearly and with empathy to the patient (where appropriate) and those close to the patient ○ Recognises the limitation of own competence and experience to make such an assessment and seeks senior advice ○ Accesses palliative care services when desired • Recognises that palliative care requires attention to physical, psychological, emotional, social and spiritual aspects of the patient's experience, and those close to them. Helps patient to access this if

		required
17.2	Care after death	<ul style="list-style-type: none"> • Confirms death by conducting appropriate physical examination, documenting findings in the patient record • Behaves professionally and compassionately when confirming and pronouncing death • Follows the law and statutory codes of practice governing completion of Medical Certificate of Cause of Death (MCCD) and cremation certificates. • Completes MCCD when trained to do so and notes details reported on the MCCD in the patient record • Demonstrates understanding of circumstances requiring reporting death to coroner/procurator fiscal • Reports death to coroner/procurator fiscal after discussion with a senior colleague • Discusses the benefits of post mortem examination and explains the process to relatives/carers • Completes relevant sections of cremation forms when trained to do this
Section 4: Safety & Quality		
18. Recognises and works within limits of personal competence		
18.1	Personal competence	<ul style="list-style-type: none"> • Recognises and works within limits of competency • Calls for senior help and advice in a timely manner and communicates concerns/expected response clearly. • Uses clinical guidelines and protocols, care pathways and bundles • Takes part in activities to maintain and develop competence e.g. seeking opportunities to do SLES and attending simulation training • Demonstrates evidence of reflection on practice and how this has led to personal development
19. Makes patient safety a priority in clinical practice		
19.1	Patient safety	<ul style="list-style-type: none"> • Delivers healthcare within clinical governance frameworks under senior/consultant direction • Describes how the needs of the patient should not compromise personal safety or the safety of others • Discusses the limitations of clinical pathways and seeks advice regarding deviating from these in certain individual patient circumstances • Undertakes appropriate pre-theatre/procedure checks including World Health Organisation (WHO)

		<p>safe surgery checklist</p> <ul style="list-style-type: none"> • Describes the mechanisms to report: <ul style="list-style-type: none"> ○ Never events ○ Critical incidents/near misses • Shows evidence of reflection on a patient safety issue with thought about possible causes, including role of human factors and system error
19.2	Causes of impaired performance, error or suboptimal patient care	<ul style="list-style-type: none"> • Describes: <ul style="list-style-type: none"> ○ The risks to patients if personal performance is compromised ○ The effects of stress and fatigue on performance (personal or of others), with actions to minimise its impact, along with sources of help ○ How medications, which they may be taking, can reduce personal performance ○ Why health problems (personal or of others) must not compromise patient care or expose colleagues or patients to harm ○ The need to report personal health problems in a timely manner and awareness of the support services available • Takes responsibility for personal health and performance, e.g. by reporting sickness absence in a timely manner and completing return to work documentation as required • Notifies appropriate individuals, and arranges cover where applicable, for planned or unexpected absences • Seeks support appropriately (e.g. GP, occupational health, support services) regarding health or emotional concerns that might impact personal performance
19.3	Patient identification	<p>F1 and F2</p> <ul style="list-style-type: none"> • Ensures patient safety by positive identification of the patient: <ul style="list-style-type: none"> ○ At each encounter ○ In case notes ○ When prescribing/administering drugs ○ On collecting specimens and when requesting and reviewing investigations ○ Before consent for surgery/procedures • Uses appropriate 2 or 3 point checks (e.g.name, date of birth, hospital number, address) in accordance with local protocols and national guidance • Crosschecks identification immediately before procedures/administration of blood products/IV

		drugs
19.4	Usage of medical devices and information technology (IT) (n.b. this excludes implantable devices)	<ul style="list-style-type: none"> • Demonstrates ability to operate common medical devices and interpret non-invasive monitoring correctly and safely after appropriate training • Accesses and uses IT systems including local computing systems appropriately • Demonstrates good information governance in use of electronic records
19.5	Infection control	<ul style="list-style-type: none"> • Demonstrates consistently high standard of practice in infection control techniques in patient contact and treatment including hand hygiene and use of personal protective equipment (PPE) • Demonstrates safe aseptic technique and correctly disposes of sharps and clinical waste • Demonstrates adherence to local guidelines/protocols for antibiotic prescribing • Requests screening for any disorder which could put other patients or staff at risk by cross contamination, e.g. Clostridium.Difficile • Takes an active role in outbreak management within healthcare settings (e.g. diarrhoea on a ward) and complies with procedures instituted by the infection control team • Informs the competent authority of notifiable diseases • Challenges and corrects poor practice in others who are not observing best practice in infection control • Recognises the need for immunisations and ensures own are up to date in accordance with local/national policy • Takes appropriate microbiological specimens in a timely fashion with safe technique • Recognises the risks to patients from transmission of blood-borne infection
20. Contributes to quality improvement		
20.1	Quality Improvement	<ul style="list-style-type: none"> • Shows evidence of involvement in quality improvement initiatives in healthcare
20.2	Healthcare resource management	<ul style="list-style-type: none"> • Demonstrates understanding of the organisational structure of the NHS and independent sector and their role in the wider health and social care landscape • Describes hospital and departmental management structure

		<ul style="list-style-type: none"> • Describes the processes of commissioning and funding, and that all healthcare professionals have a responsibility for stewardship of healthcare resources • Describes accountability of the NHS in its context as a publicly funded body, and the need to ensure the most effective and sustainable use of finite resources • Recognises the resource implications of personal actions and minimises unnecessary/wasteful use of resources e.g. repeat investigations, delayed discharge • Describes cost implications of common treatments in terms of money, equipment and human resources (e.g. generic prescribing, intravenous v oral antibiotics)
20.3	Information management	<ul style="list-style-type: none"> • Seeks, finds, appraises and acts on information related to medical practice including primary research evidence, reviews, guidelines and care bundles • Critically reviews research and, where appropriate, presents finding (e.g. journal club).

Local teaching programme

There will be an expectation that you attend local postgraduate teaching programmes, as well as specific programmes that Foundation Year 1 Programme facilitates. Monitoring processes are put in place and 70% overall attendance to the above programmes are expected.

Optional additional opportunities (e.g. teaching, specialist experience)

1. Perform cognitive assessments.
2. Gain experience from other specialist teams e.g. Working Age Adult Psychiatry and/or liaison psychiatry teams, Child and Adolescent Mental Health Service Team, Care Homes Team.
3. Observe electro-convulsive therapy treatment.
4. Teach medical students.

Expectations (core professional competencies)

1. To maintain confidentiality of information at all times.
2. To be conversant and comply with Trust Health and Safety Policy.
3. To act at all times in the best interest of patients.
4. To be aware of and adhere to all Trust Policies and Procedures.
5. Attend all relevant mandatory and statutory training as required.

**Yorkshire Deanery Foundation School
Foundation Placement Competence Matrix**

POST : Foundation Programme Year 1 in Psychiatry

The following table gives an indication to what extent the following competence areas of the National Foundation Curriculum can be met in this post.

KEY

- Red:** Not at all
- Amber:** To some extent/limited opportunities
- Green:** To a great extent/ample opportunities

Curriculum competences (and any additional competences such as audit etc) expected to be achieved:

Section	Outcome	Expect to achieve
Professionalism	Behaviour in the workplace	Green
	Health and handling stress and fatigue	Green
	Time management and continuity of care	Green
Good clinical care	Eliciting a history	Green
	Examination	Green
	Diagnosis and clinical decision-making	Green
	Safe prescribing	Green
	Medical record keeping and correspondence	Green
	Safe use of medical devices	Amber
Recognition and management of the acutely ill patient	Promptly assesses the acutely ill or collapsed patient	Amber
	Identifies and responds to acutely abnormal physiology	Amber
	Where appropriate, delivers a fluid challenge safely to an acutely ill patient	Red
	Reassesses ill patients appropriately after starting treatment	Green (mentally unwell)
	Undertakes a further patient review to establish a differential diagnosis	Green
