Process for providing support to PGDiTs after an ARCP

ARCP Panel Identifies that a PGDiT is in need of additional support during an ARCP.

↓

ARCP Panel document need for additional support in ARCP Form: "the panel recommend that Dr X arranges to meet with their educators to develop a clear educational plan and identify additional support available from the GP School."

↓

PGDiT speaks with clinical / educational supervisor and agrees a support plan. If additional support is needed, ES / CS communicates needs with scheme TPD.

ARCP outcomes shared with Specialist Training Support TPDs, who review O2 / 3 / 4 and identify PGDiTs who might be in need of additional support.

↓

Scheme training support TPD lead and specialist training support TPD meet regularly and discuss PGDiTs in need of support. They mutually determine who is best placed to provide support, and how urgently this is needed.
