

Champion of Supported Return to Training (SuppoRTT): Specialty Based Advert

A number of outstanding individuals are sought to join the Supported Return to Training initiative, working across Health Education England, Yorkshire and the Humber.

Accountable to the Associate Deans, the ideal candidate(s) will be an experienced NHS professional with a thorough understanding of the multi-professional education agenda.

Based in a secondary care organisation, the post-holder will provide trainees of all specialties and their supervisors with guidance regarding the relevant policies and available resources. They will promote the upskilling of educational supervisors to ensure the SuppoRTT process is reliably implemented. This individual will, through ongoing support and advocacy of those involved, eventually help to effect a change in workplace culture such that the SuppoRTT programme becomes fully ingrained.

Appointees will be employed by a Trust and will be seconded to HEE with payment to their current Employer at the rate of 1 PAs/sessions per week. The Trust will therefore remain the post-holder's Employer. It is expected that the current employing organisation will have given prior agreement (at least tacitly) to the application.

These Roles are Specialty based with the below required;

- 1 x SuppoRTT Champion for Specialty School Anaesthetics (role will be undertaken by a Anaesthetics Consultant)
- 1 x SuppoRTT Champion for Specialty School Paediatrics (role will be undertaken by a Paediatrics Consultant)
- 1 x SuppoRTT Champion for Specialty School Emergency Medicine (role will be undertaken by an Emergency Medicine Consultant)

How to apply

Applications should be addressed to Dr Ros Roden and Dr Maya Naravi and submitted via email supportt.yh@hee.nhs.uk

Your application should include:

- A copy of your current curriculum vitae
- Supporting statement, no more than one-side A4, detailing why you believe that you are suitable for the post

Closing date for applications: 02 January 2019

Interview date: 18 January 2019
