Course Title

Awarded by: *RJ Spencer*

Dr J Spencer, Postgraduate Dental Dean

Date

Course Name: DCT1 Orthodontics and Dental Maxillofacial Radiology  
21MAR25

# Course Aims and Objectives

**Development Outcomes:** This CPD course meets the criteria for the GDC's development outcome(s) A and C.

## Aims:

This course will help attendees understand:

- The importance of interceptive orthodontics in managing common orthodontic anomalies.
- The interface between dental and maxillofacial radiology and orthodontics.

## Objectives:

- Recognising and managing impacted canines.
- Guidelines for planning the extraction of poor prognosis first permanent molars.
- The first use of imaging in orthodontics, including CBCT.

## Learning Outcomes:

- An understanding of occlusal anomalies appropriate for early interceptive orthodontics.
- An understanding of when it is appropriate to refer the interceptive orthodontics.
- An understanding of the correct use of IOTN.
- An understanding of the use of CBCT in orthodontics.

# Reflection

Reflection is an important part of CPD. Reflection involves thoughtfully considering experiences, practices, and outcomes to identify areas for improvement and enhance the quality of patient care. More information on reflection can be found on our website.

- What did you learn (or confirm) from the activity that was helpful or relevant to your daily work and patients?
- Did you identify any changes/updates needed in your daily work, and if so, what? How did you make these changes?
- If you didn't identify changes needed, what did the activity confirm for you, that you may already know or be doing?
- What was the benefit to your work and/or your patients in carrying out this activity?
