

FRCP Requirements

Complete Complex treatments and clinical activity logs - activity should include :

- Twelve indirect restorations (e.g. crowns, inlays, onlays). To include at least one of each type, if possible
- Two bridges. To include one conventional bridge, if possible
- Twelve acrylic prostheses
- Two Co-Cr prostheses
- Twelve endodontic cases – to include both single-rooted (incisors and/or canines) and multi-rooted endodontic cases (molars and/or premolars) (x4 molar endodontics procedures are recommended)
- Four extractions of special difficulty (which may involve bone removal and/or flaps): one undertaken as SLE (DOP or mini-CEX) with ES,

Assessment	Minimum Requirement	Notes
Significant Events	Reporting required in e-portfolio and ESS' Structured Reports	<ul style="list-style-type: none"> • Panels will take account of the evidence and its relevance to Satisfactory Completion in reaching their recommendations
Complaints	Reporting required in e-portfolio and ESS' Structured Reports	<ul style="list-style-type: none"> • Panels will take account of the evidence and its relevance to Satisfactory Completion in reaching their recommendations
Clinical Audit	Two audit cycles to be completed	<ul style="list-style-type: none"> • Evidence confirmed by TPD/ES
MSF(s)	Completed by ESR and IRCP (and prior to FRCP if required)	<ul style="list-style-type: none"> • Must include ES(s), FD's Dental Nurse, Practice Receptionist • Repeated in Months 8 or 9 if required by IRCP Panel
PSQ(s)	Completed by IRCP (and prior to FRCP if required)	<ul style="list-style-type: none"> • Minimum of 20 submitted forms required • Repeated in Months 8 or 9 if required by Interim Panel
Study Day attendance	All NHSE Local Office/Deanery Study Days (or approved alternatives) attended, recorded and evaluated reflectively	<ul style="list-style-type: none"> • Normally 30 Study Days in 12 months period • Study Days held after Final RCP recommendation must be attended and evaluated for Certificate of Satisfactory Completion of DFT to be issued
Educational Supervisor Protected Learning time Programme	All Tutorials required by NHSE Local Office/Deanery completed, recorded and evaluated reflectively	<ul style="list-style-type: none"> • Normally 40 Tutorials in 12 months period • Tutorials scheduled after Final RCP recommendation must be attended and evaluated for Certificate of Satisfactory Completion of DFT to be issued
IRCP Outcome	FD to review IRCP recommendations and to evidence completion/progress within the portfolio	<ul style="list-style-type: none"> • Panels will review and consider if IRCP recommendations have been met at FRCP

Confirmation of EPAs and expected entrustment levels for completion of DFT

EPA	DFT/DTFT FRCP Entrustment Level
1 NP Assess/Manage.	Independent (Level 4)
2a Perio and Restorative/Endo.	
2b XLA and Replacement	
3 Assess/Manage Child.	
4 Emergency Care.	Reactive (Level 2)
5 Complex Needs	
6 Population Oral Health.	Distant (Level 3)
7 Managing the service.	
8 Improving Quality	
9 Developing self & others	

Evidence to support EPAs

1. Sufficient depth and breadth of clinical experience as indication by FRCP clinical experience recommendations.
2. Protected learning time covering expected outcomes for EPAs
3. FD reflection covering experience gained to support EPAs
4. Developing clinical teacher SLE linked to EPA 9 (where relevant)
5. DENTL SLE linked to EPA 6,7,8,9 (where relevant)
6. DtCT SLE linked to EPA 6 and 9 (where relevant)
7. Significant Events
8. Quality improvement audits/projects (linked to EPA 8)

Portfolio Evidence

1. Supervised Learning Events

A minimum of 24 SLE's should be available on the portfolio at FRCP, the SLE's should provide sufficient evidence that each clinical EPA has sufficient evidence to allow the ES to confirm the level of entrustment and to provide confidence to the FRCP panel that this evidence supports satisfactory completion of DFT.

2. Learning needs

These should all be reviewed and if indicated signed off as complete, any unsigned off learning needs that the FRCP panel consider essential to confirm the indicated entrustment level could mean completion of DFT is delayed.

3. Clinical Experience Logs and UDAs

Clinical experience logs should be completed for July, prior to FRCP panel days, this is to ensure all relevant clinical experience has been captured in the portfolio.

The BSA Compass report should be uploaded to the portfolio to evidence UDA activity achieved, by FRCP it is expected this will be above 1400 UDAs, if activity is significantly below this then the FD should provide a reflection to indicate the reason behind this.

4. ES FRCP report and FD comments

This report should be completed jointly, with your Educational Supervisor(s), with your own comments; without this evidence FRCP panels will be unable to reach a decision on completion of DFT.

5. IRCP recommendations

Please review IRCP panel reports and ensure any recommendations are met or if not, an explanation is provided.

Final month of program

Following FRCP panels an Outcome will be awarded, the outcomes are below

- Outcome 6: Satisfactory completion of DFT has been confirmed
Outcome 3: Extension to DFT programme recommended
Outcome 4: Released from DFT programme, without achieving all required competencies/EPAs
Outcome 5: Incomplete evidence provided, an extension to training may be required or if linked to professionalism and Outcome 4 may be considered by the panels

All FDs who achieve Outcome 6 will be issued with a satisfactory completion certificate on the portfolio which should be downloaded and stored safely for evidence supporting full inclusion on the NHS Performer Lists.

Completed	Portfolio Task
	Completion and update Regular Portfolio Tasks
	Ensure all Study Day CPD certificates have been downloaded to support own PDP and GDC CPD evidence
	Download Completion Certificate and confirm with PCSE change in performer number status (removing restrictions linked to DFT program) for DFT/JDFCT only
