

Course Aims and Objectives

DTFT: Management of Dental Trauma 04JUL25

4 CPD Hours

Development Outcomes: B & C

Aims:

- The aim of this study day is to update foundation dental therapists on the management of traumatic dental injuries.

Objectives:

- The presentations will go through the different fracture and luxation injuries and illustrate their presentation, assessment, diagnosis and management with clinical cases.

Learning Outcomes:

By the end of the session, foundation therapists will be able to:

- Manage acute dental trauma with more confidence
- Understand the importance of a-traumatic techniques
- Understand the need for good communication in the consent process
- Improve knowledge of treatment planning for traumatised teeth.
