Summary of Evidence for ARCP

Setting up a placement and learning agreement on ISCP:

Placements are set up by the trainee by: Dashboard – Trainee Setup – Training History – Add a New Placement. (or by Add – Training History – Placement)

Please note that placement dates should be set up from ARCP to ARCP. There should be no overlap in placements nor gaps between placements.

Clinical Supervisor Comments	Clinical supervisors should be prompted by ISCP to complete these fields. Trainees can also email clinical supervisors to request they do this prior to lockdown. Once clinical supervisors have completed their report this should be visible within the current learning agreement. In order for clinical supervisors to be able to add a comment, clinical supervisors must be added to the current 'placement' by the trainee. This should be done when setting up a new placement. Alternatively, if a placement is already set up and you need to add a clinical supervisor retrospectively, go to: dashboard – trainee set up - training history, click on the current placement, retract, edit accordingly and re-submit placement.
