

Place based lead for North Lincolnshire's Community First Strategy

"I was reflecting on my experience of the Generalist School and it is really positive. I arrived home last night with an unusually springy step! It's also connected me across the system to work, issues and people that I wouldn't have been able to connect with in any other way. Perhaps most significant is that it's shifted and accelerated my thinking."

Please come and join us in April 2025 York and North Yorkshire.

Lead Clinician for Quality, Standards & Compliance, Haxby Group.
Primary Care Educator, Primary Care School, NHS England - Yorkshire

 Queen's Nurse

“I attended the ENHANCE programme to further improve my awareness of informed collaborative system working and better my understanding of whole person-centred care...I was keen to better understand the intricacies of the system and take time to consider how this impacts patient care and sustainability, involving staff, healthcare provision, and environmental issues. I was able to explore the healthcare needs and priorities of the populations served in the wider healthcare system. I really enjoyed networking with colleagues from health and social care. It was refreshing to acquire new skills...I would recommend the ENHANCE programme to anyone who wishes to develop integrated working with greater generalist skills. What a fantastic like-minded community to be a part of.”

John is a GP Registrar who joined our enhance explore programme in 2022. John wanted to develop the skills he needed to support a person-centred approach whilst deepening his understanding of population health, health promotion and care needs of the communities he worked in.

John enjoyed the enhance explore programme so much that he joined the enhance team as a leadership fellow to further his learning and continue the 'generalist' legacy. John has since then presented at numerous conferences with his work and made changes within the GP training curriculum.

To hear more about John's thoughts on the course click on this link -

The single most important take home message from the enhance explore programme would be;

‘To look at problems from multiple perspectives and get people involved, work collaboratively!

To provide a holistic, rounded approach to patient care you need to involve multiprofessionals and involve the patients as well. I think that's important.’

Please come and join our April 2025 programme (York and North Yorkshire).

'The modules that we're covering through the Enhance programme have not only added to my current knowledge but strengthened my conviction in the way that we connect with each other is absolutely vital to support people in the community'.

'Networking with people on the programme has widened my view of the system and is one of the things I have found most valuable. I feel more confident to speak to people within the NHS, as I have a greater understanding of their perspective and challenges. Furthermore, through the programme I have developed contacts that are beneficial for my role'.

Melanie Fullbrook - Alzheimer's Society
Local services manager

‘I joined the programme as an F1, a cog in the NHS machine, unsure of how my role can best influence care. However, through completing the programme, I now have a greater understanding of how my role fits alongside other health professionals' and how we can work together to have a bigger and better influence on patient care’.

‘Initially I didn’t really know what the enhance programme was but I attended a Bridging the Gap session (introduction to generalism) and I learnt some really interesting facts about Health Literacy, RESPECT forms and patient centered practice. I thought Yeah! I would like to learn more about this, which inspired me to sign up to the programme.’
